TOUR RIDER – September 29, 2020

## **INFO**

If one or more specification cannot be fulfilled or are unclear don't hesitate to contact us. The Band travels without their own sound or lighting technician. We are happy about enthusiastic sound and lighting technicians.

On the day of the concert a responsible person of the local promoter must be on site from the beginning of setup until the dismantling.

## **STAGE**

The stage should be at least 4x3 meters. Open air stages must have a roofage and be protected against wind and rain. The band is happy about the presentation of the band logo. The band logo can be delivered digitally or a banner can be brought along.

## **MERCH**

The band has the right to sell its own items such as CD, T-Shirts etc. and does not have to pay any additional fees. The group needs a visible area with at least 1 table. This will be provided by the local promoter.

## **SECURITY**

The local promoter is responsible for and had to ensure the safety at the event.

## **BACKSTAGE**

Upon arrival of the band a clean backstage area with chairs or couch and at least one table is required.

## **BACKSTAGE PASSES**

The band needs at least four backstage passes or more by arrangement
